EDUCATION

University of Maryland, College Park
Bachelor of Science, Information Sciences

Expected May 2025

TECHNICAL SKILLS

Programming Languages: Java, C, Python, JavaScript, HTML, Lua, C++

PROJECTS AND INDUSTRY INVOLVEMENT

Introduction to Computer Systems for Computer Science College Park, MD Student Aug 2022 – Dec 2022

- Developed a C program that simulates a calendar where you can add and remove events in several ways.
- Developed a C program that simulates a document management system where you can create documents, save them, and load documents to manipulate.

Personal Project - Ping Pong Nov 2023

- Developed a Java program that simulates a ping-pong game. It keeps track of score and ends when a player reaches a score of 5.

Personal Project - Roblox Game August 2023 - Current

- Developing a Roblox game based on pirates with a team of people. Currently has multiple systems for saving player data and manipulating it throughout various scripts. For example, a crew system that loads in player data from the global data store and updates it along with all the UI for players in the same crew accordingly.
- Developed a framework for organizing/safely initializing all the scripts in the back end. Also allows for clear error detection and handling.

Dynamic Web Applications College Park, MD Student Jan 2024 - May 2024

- Developed an HTML program that consisted of a home page (users could redirect themselves to two other web pages or the contact page on this program), a game page (users could play rock, paper, scissors), and a contact page (user would put in their information and comments, submit, then be sent back to the home page). Users can access all three pages by using the buttons at the top of each page.
- Developed a JavaScript website that consisted of a home page, a voting page, and an about page. Users could vote on their favorite Pokémon and see results in real-time. Utilized Supabase to make this possible (currently paused). <https://mbokeno.github.io/PokeVote/index.html>

Personal Project - 3D Portfolio August 2024

- Developed 2 JavaScript websites to host my resume. On one of the sites, I utilize Three.js to create a 3D scene that holds an Iframe to hold my second website, which details my past and current projects.

Personal Project - Social Media Platform April 2025

- Developed a C++ program that simulates a simple social media platform. In the platform, you can register

an account, log in, view/search user profiles, create posts, follow/unfollow users, like/unlike user posts, and comment on posts.
